

## Amendment No.2 to the Global Organic Textile Standard (GOTS), Version 1.1

### Revision of a criterion in section '2.3.2. Prohibited / restricted inputs in all production stages', approved by the International Working Group on Global Organic Textile Standard

*The wording for the criterion as listed below replaces the wording of GOTS, version 1.1. from today (22/07/2006) onwards. The changes in wording have been underlined. The revision remains valid until it is recalled by the International Working Group on Global Organic Textile Standard resp. until the next version of the GOTS is published.*

#### 2.3.2 Prohibited / restricted inputs in all production stages

...

Substance Group	Criteria
Quaternary ammonium compounds	Prohibited; <u>Exception for auxiliaries used for fixing purpose in the dyeing process provided they meet all other criteria of GOTS. A review of this allowance will be done in three years. Pre-treatment of fabric with quaternary ammonium compounds for cationization is not allowed.</u>
